

50 WEALTHIEST SCHOOL DISTRICTS – 2009 MATH PERCENTILE

The GRC score indicates the level of math or reading achievement by the average student in a district when compared to the achievement in a set of 25 developed countries. The score is presented as a percentile, which is the percentage of students in the comparison group who would have a lower level of achievement. For example, a percentile of 60 would mean that the average student in a district would be performing better than 60% of the students in the comparison group.

This list represents the percentile scores for the 50 wealthiest U.S. school districts serving communities that have at least 50,000 residents based on 2009 data, the most recent data available for conducting this analysis.

In 2009, these 50 US school districts, on average, ranked behind nearly half of their international competitors in mathematics.

City, State	Median Household Income	Math 2009
1. Cupertino, CA	\$107,877	70%
2. Bethesda, MD	\$99,102	57%
3. Greenwich, CT	\$99,086	68%
4. Flower Mound, TX	\$95,416	59%
5. Burke, VA	\$93,561	51%
6. W. Bloomfield Township, MI	\$91,661	61%
7. Pleasanton, CA	\$90,859	65%
8. Palo Alto, CA	\$90,377	67%
9. Yorba Linda, CA	\$89,593	43%
10. Naperville, IL	\$88,771	70%
11. Highlands Ranch, CO	\$86,792	65%
12. Newton, MA	\$86,052	82%
13. The Woodlands, TX	\$85,253	58%
14. Milpitas, CA	\$84,429	41%
15. Wayne, NJ	\$83,651	67%
